

CW-FLEX Collections

Making full use of mass-produced wire cutting machines,
we realize a unique temple design with springiness.

CW-FLEX S

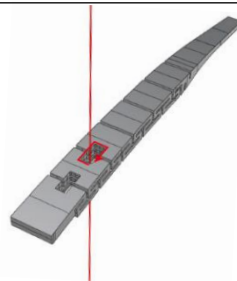

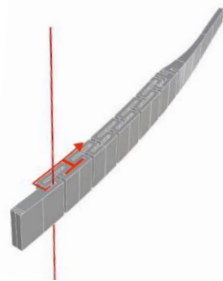

CW-FLEX F

CW-FLEX

Wire cut for vertical direction

Wire cut for horizontal direction, hole by hole

Complete!

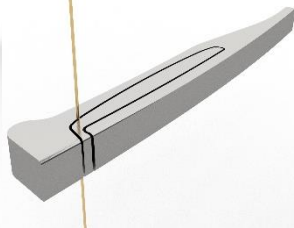

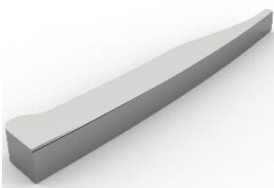

CW-FLEX U

Make a regular press temple

Arrange several temples vertically and wire cut in a single stroke.

Complete!

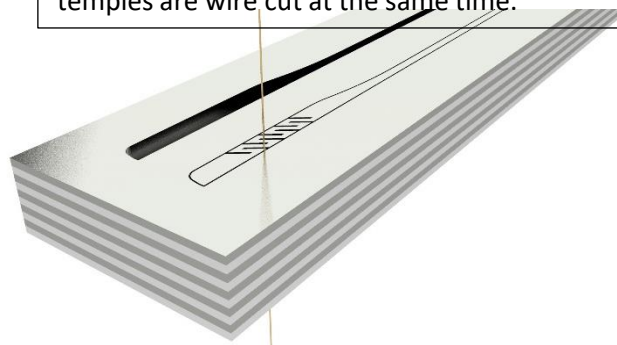

CW-FLEX S

Stacked multiple sheet materials and multiple temples are wire cut at the same time.

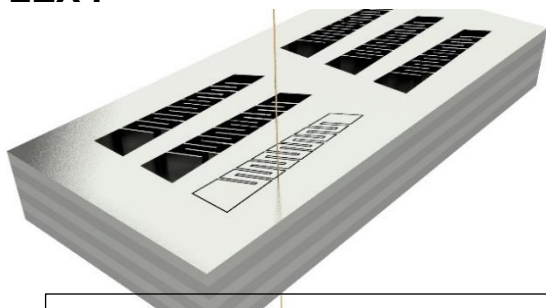

Show the cut design from the top.

CW-FLEX F

Like CW-FLEX S, it is made by stacking sheet materials, but a different design is possible by showing the cut pattern from the side of the temple.

Show the cut design from the side.
