

# Silicone “Mush Pad”

## On sale with great reviews!

Our “Mush Pad” is a silicone nose pad which is produced by thermoforming. Because of this manufacturing process, mush pad is more durable than injected silicone pad and hardly breaks. Moreover, mush pad is made of two different types of silicone which makes it **easy to insert and hard to come off**.

**MP-03 (Clear Mat)**

**MP-03 (Black Mat)**

**How to use?①**

Mush pad and one-piece construction front are a perfect match.

**How to use?②**

We also have special pad arms for mush pad when you need to solder pad arms. e.g.) Titanium frames

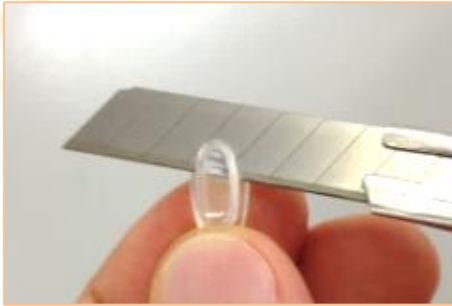

**Pad arm for mush pad**

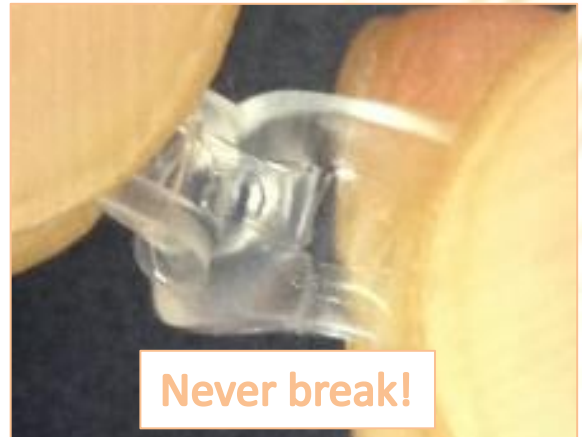

**Material: Titanium/Nickel Silver**

# 【4 Features of Mush Pad】

## ① Surprisingly strong! Never break!

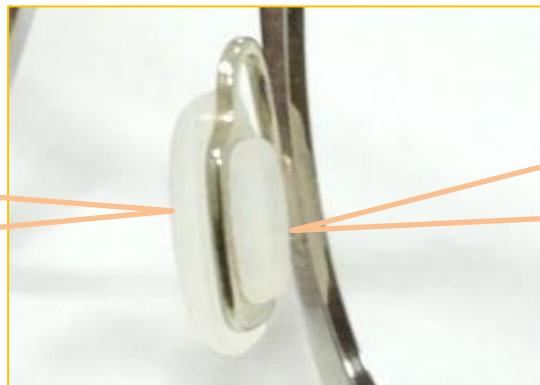

We cut a piece of mush pad and tried to break it off. Even if we try, it does not break.

Never break!

## ② Easy to insert, difficult to come off

Touching part to the skin is made of H50 (relatively soft silicone.)

Inserting part is made of H65 (hard silicone) which makes it hard to come off.

2 types of silicone (soft type, hard type) realize an "easy to insert, difficult to come off" nose pad.

## ③ Original design

We are able to produce original nose pad at approximately 1,250 USD.

## ④ Colorful mush pad

Colorful mush pad is also available. As shown in the picture, only one side of the pad can be colored.
