

# SPR & SPR colored

Colored types have been added to SPR (Silicone Protection Ring) for lens protection of frames made from very thin sheet front (Half rim groove for the lens).  
Would you like to spice up your rimless frame?

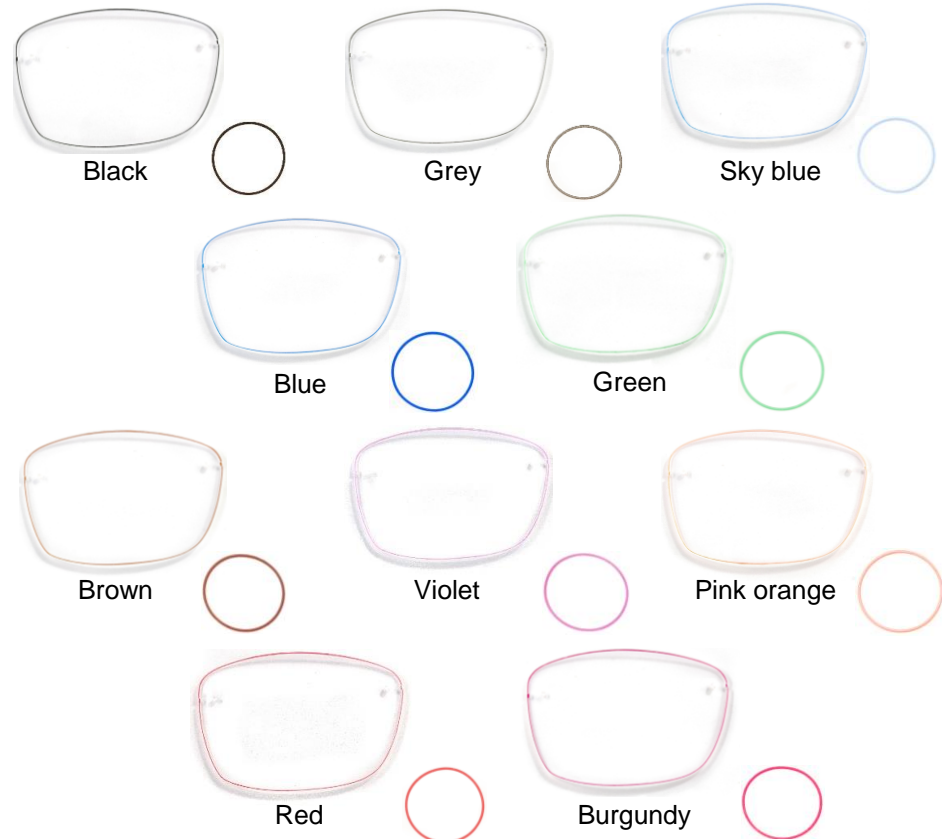

## SPR27/32: For lens protection

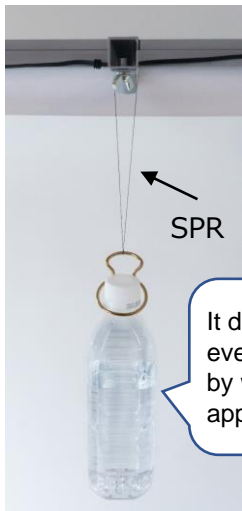

The silicon ring will not come off easily with processing the groove a little deeper.

## SPR20: For decoration of rimless frame

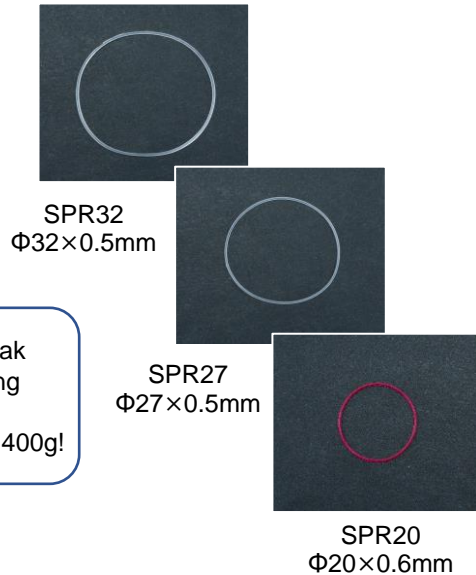

## SPR is made of silicone

It is a strong and hard-to-deteriorate material.

It does not break even if it is hung by weight of approximately 400g!

## Size Variations
