

ZDC (Zinc Die Casting)

Die-casting can be processed into complex shapes at a low cost. We have 20 design samples including the following samples. Original designs are also available. Please feel free to contact us!

Product feature for ZDC

1. Zinc is a metal that is easy to polish.
A beautiful luster can be produced that is essential for eyeglass parts.
2. Plated and painted colors are also available. The standard specification is to pass a 48-hour sweat resistance test.
3. Zinc cannot be soldered. We recommend using zinc parts as decoration parts by insertion or assembling.
4. Zinc products with plated and painted colors comply with REACH regulations.

Cost reduction!

Good Luster!
