

# Thermoforming "Mush Pad"

Our **"Mush Pad"** is a silicone nose pad which is produced by thermoforming. Because of the manufacturing process, Mushroom Pad is more durable than injected silicone pads and hardly torn. Moreover, the mold cost is much reasonable compared to an injection mold. Therefore, we can offer you a much better price to produce original nose pads based on your design.

## Product Example

"Click-in" nose pad goes very well with a sheet front as shown above.

## Standard Product: ICN02

## Product Features

### Point 1. Hardly get torn

Tension Test

Injection Pad

The neck part of the pad is easily torn when you pull it.

Mushroom Pad is very durable and hardly torn even if you try to break it.

"Mush Pad"

### Point 2. Original pad at a lower cost!

We can offer you a more attractive price to produce **original nose pads based on your design** because mold cost for Mushroom Pad is more reasonable than an injection mold.
