

Broaden design possibility!

Heat-shrinkable tube "ART FLEX"

ART FLEX is a very durable Polyolefin tube which shrinks at 100°C. This tube always recovers its original shape at 100°C. Therefore, dents on the surface disappear when it is heated at approximately 100°C. Please check all the colors we have including the stripe colors.

Dents **disappear** at 100°C.

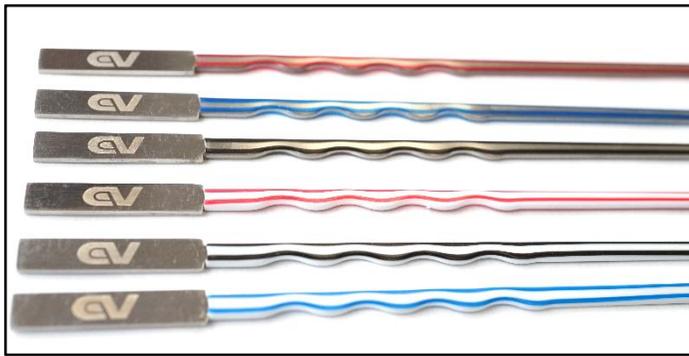

ART FLEX Color Variation

Standard Colors

Demi Colors

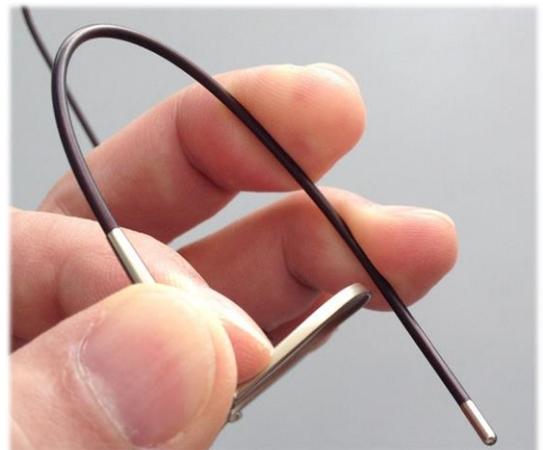

Stripe Colors

No problem even if temples are bent.

ART FLEX Example

For thin NT temples

Stripe colors
