

Super Thin Acetate Temple

Acetate temple usually needs some thickness. Therefore, it is very difficult to make light, thin frames. We are able to realize **"1.7mm" in thickness** for acetate temple. This product helps you to develop very light thin frames with the beautiful feel of acetate.

Product Example

It has flexibility with the beautiful feel of acetate.

Stainless Steel Wire Core inside

Have you seen very thin **acetate** temple? This makes it possible to have the elegance of acetate, thinness and flexibility together. Moreover, we will not let you have trouble arranging materials because we have **172 standard colors of acetate** in stock.

Pick suitable materials from our [172 standard colors](#) for the super thin temple.
