

## “Silicone Components” is available on EV website!

“[Silicone Components](#)” pages are now available on our website. Silicone is a non-allergic and anti-slip material. We have many silicone products such as “Mush Pad”, “Wing Pad” and other components which require good elasticity.

### Product Example

Silicone combined with sheet metal temples

Combination with memory alloy

Silicone Protection Ring (SPR)

Silicone Pad

### Safe, Eco-friendly Material “Silicone”

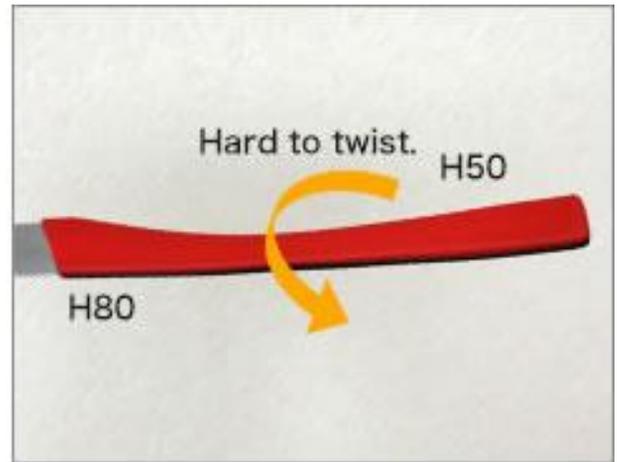

Silicone is a very safe material. It is used for kitchen utensils and toys for kids which normally require a high level of safety.

“How to tell the difference between Silicone and Rubber?”  
Click the image and watch the video on EV website.

## Combination of two different types of silicone

By having a combination of two different types of silicone, H50(soft) and H80(hard), a silicone component becomes hard to twist.

## Color Information

We have 87 standard colors. \*On the website, 25 popular colors are available.

If you are interested in other colors, please contact our sales staff.

We are happy to prepare a color chart for you.

### Check interference color in advance

All the colors we have are not transparent or half-transparent. However, background colors can be seen when silicone components are too thin. We recommend using our special color chart which have 3 chips in 3 different thickness for each color. Therefore, customers can check interference color in advance.

**If you need further information, please contact our sales staff or email us ([euro@eurovision.co.jp](mailto:euro@eurovision.co.jp)).**
