

3DAL

A version evolved from an Acetate Puzzle Sheet, 3DAL (**3D** Acetate **L**amination) applies high-precision 3D cutting, creating shadows and depth within the acetate sheets. This process allows for the creation of uniquely expressive acetate sheets unlike anything seen before.

INTER EYES CO., LTD.

EV EURO VISION CO., LTD.

The feature of 3DAL

Each surface is 3D cut so that the cross-sections of the laminated sheets fit together perfectly.

The two sheets fit together perfectly when layered.

How to order

Please provide the color of the acetate sheet and the frame design (illustrations, drawings, etc.). We have sample books of design patterns available for design reference.

If you would like to make a frame like this:

We will design the sheet based on the frame design

Small-cut sheets with original designs are available.

All colors from **our partner manufacturers** are available.
