

Silicone Air Modan

Silicone temple tips have a comfortable fit. Silicone Air Modan is hollow at the end for even greater comfort. The hollow space is completely enclosed so the cleaning solution does not get into the temple tip during cleaning.

Silicone Air Modan is hollow at the end and has cushioning. It leads to even greater comfort.

SAM-01

(Air cushion is inside the temple tip)

SAM-02

(Air cushion is at the lower side of the temple tip)

Completely closed air cushion!!

The cleaning solution does not get into the temple tip during cleaning because there is no hole in the hollow.

Two kinds of samples are available: 1. Front and back side: Black 2. Front: Black / Back side: Clear
