

Decoration screw

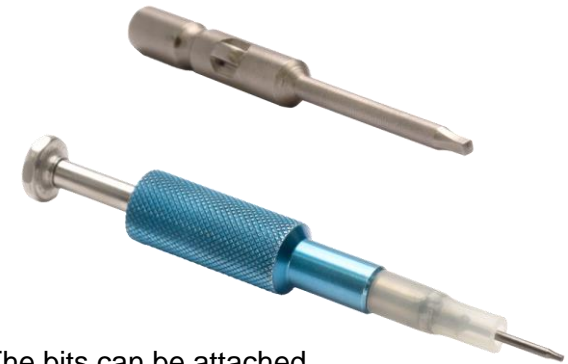

How about using a screw which has decoration on the screw head? This decoration improves the decorativeness of the frame and enhances its value. The screws are produced by header process + turning process, which gives a fine finish. Moreover, it can be provided at a reasonable price. Original shapes on the screw head are available. We can provide a screwdriver bit matched to the original screw head.

DS-1 (M1.4x2.0x5.8)

Shape: Square

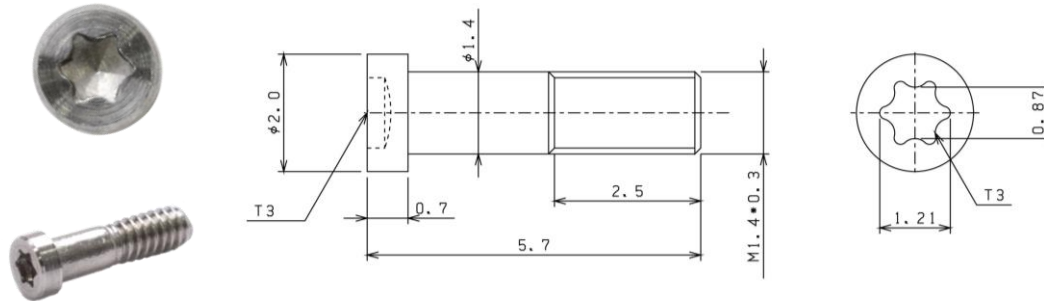

We can provide an exclusive screwdriver bit for DS-01

DS-2 (M1.4x2.0x5.7)

Shape: Torx T3

The bits can be attached to commercially available screwdrivers.

**Original shapes on the screw head are available.
We can provide a screwdriver bit matched to the original screw head.**
